

# Wynn Stewart, Cause I Have You

A flower needs the earth to make it grow  
A river needs the rains to make it flow  
A clinging vine needs something to cling to  
But I have all I need cause I have you

Before we met my life was one sad song  
But you changed all that the day you came along  
For a true love song needs inspiration too  
And I have all I need cause I have you  
( steel )  
Arms need more than arms to hold on to  
And lips need other lips to make dreams come true  
Two hearts in love will always beat in two  
And our hearts beat as one since I have you  
Before we met...
