

Wynonna Judd, What The World Needs

I look around at all the faces and I see
All the lonely people looking back at me
Rich, poor don't matter we're all the same
Everybody's hungry in a different way
We're clawin' and climbin' and kickin' and screamin' and fightin' but really

[Chorus]

What the world needs now is love

Love and only love

A little help from up above

Faith to make a better day

Let's come together

Lay our differences down

Spread it all around

That's what the world needs now

(La, la, la, la, la)

Sometimes all it takes is just a smile

To change somebody's weather

Chase the clouds out of their sky

Sometimes you gotta give and not receive

Sometimes you gotta live what you believe

Open your arms cause that's where it starts

Right here with you and with me

[Chorus]

[Bridge]

Nobody likes the cold

We all need someone to hold

No one wants to be alone

[Chorus: Repeat 3 times]

([Third time:] "Let's come together, lay our prejudices down...")

(La, la, la, la, la)

[Fade Out]
