

X-PERIENCE, Back to the roots

E-mails from outer space
bytes and bits
are on the race
to the moon and return
the light of mankind will burn
back to the roots
the place where we are born
right where the crown of creation comes from
back to the roots
to the beauty of youth
we are going back
to make a new start
world wide web - mtv rule the days
i am going to be
slave to screens - to machines
living in electricity
humankind on the run
we dont care about what we have done
neon light night and day
time is ticking away
