

X-Ray Spex, Crystal Clear

How do you feel now? I want to know
Clear as crystal, I can see your face
In my glass of water, I can see your face
How do you feel now? I want to know
Does your love burn like a summer's day
Or is it still on hold in an ice cube tray?

Clear as crystal
How do you feel now? I want to know

Clear as crystal, I can see your face
In my glass of water? I can see your face
Winter has passed now, did you ever know?
Is your love forming like the springtime
Or is it still a snowdrop in the snow so fine?
Clear as crystal

Clear as crystal, I can see your face
In a glass of water, you can see your face
How do you feel now, I want to know
Now I can see you so crystal clear

Crystal clear
