

X-Ray Spex, Prayer For Peace

We got something don't you know it's true?
We got something don't feel it too?
We got something, we got something to do
Not a mushy line that I'm pushing on you
Just another blue-note sung slightly out of tune
We got something, we got something to do

Prayer for peace, prayer for peace
Prayer for peace.

It may appear that we've been sleeping through our years
And we've been living in an imaginary world
But we know what
We know what we got
And if the choice was your of love eternally
Or destruction of the world by some atomic energy
The you'd know what
You know what we got

Prayer for peace, prayer for peace
Prayer for peace. (repeat)
We got got got, we got got got, we got we got something
We got we got got got, we got got got, we got we got something
Prayer for peace,
Prayer for peace,
Prayer for peace.
