

Xandee, Ay Que Calor

You, spice up the night
You're like the first morning blue in the sky
I say
You, sweep me away
Love can be easily turned into pain

No I, don't need no other
So open your heart out to me

CHORUS

Ay Que Calor
Get on the floor
You can define, but don't deny
And than come running back for more
Ay Que Calor
Get on the floor
And I'll be everything you want me to be
Muchacho

Lord, give us your soul
Turn up the rhythm and let yourself go
I say
Don't give up your faith
Light up the acker and take me away

No I, don't need no other
So open your heart out to me

CHORUS

You, you take me higher
Lying out there in the sun
My heart is full of desire
Is waiting for all that will come
