Xiu Xiu, Xiu Xiu - The Body Breaks

The body breaks And the body is fine I'm open to yours And i'm open to mine

The body aches And that ache takes it time But you'll get over yours And i'll get over mine

And the sun will shine And the moon will rise up

The body calls Yeah, the body, it calls out It whispers at first But it ends with a shout

The body burns Yeah, the body burns strong Until mine is with yours Then mine will burn on

My flesh sings out It sings, "come put me out"

The body sways Like the wind on a swing A bridge through a hoop Or a lake through a ring

The body stays And then the body moves on And I'd really rather not dwell on When yours will be gone

But within the dark There is a shine One tiny spark That's yours and mine
