

Yvonne, Six Deadly Venoms, Album True Love 1999

she's the itch inside my chest
she's my mistress and i'm hers for she
cramps and holds on tight
oh god i am the one
i must run tonight

she takes advantage of me now
she's a parasite and i play the part of the devastated host
i know that is the part she loves the most

can i get out when i'm already trapped
it's a solution to this i must find
but i don't know how
oh i am lost without it but still
i really really need a way to get out
but i don't know how

she's the itch inside my chest
she's the reminder of my other sides
the whisper in my head
she's comfort in my bed
i run tonight
i hope for someone to take me in
i hope for someone who will hold me tight despite my different sights
oh god i hope that i can be safe tonight

can i get out when i'm already trapped
it's a solution to this i must find
but i don't know how
i know i'm lost without her but still
i really really need a way to get out
but i don't know how

can i get out when i'm already ...
it's a solution to this i must find
but i don't know how
well i'm lost without her but still
i really really need a way to get out
but i don't know how
