

Zebrahead, Karma Flavored Whiskey

If this is it, then I've given all I can

The road that leads to nowhere has fallen in my hands

If this is it, then the needle has been found

The haystack is long gone

and the world's turned upside down

I see right through you

Everything you do

Leech on the side of me

Covert hostility-your negativity

Drains to get what you need

Your vampire logic

Turned out tragic

Lost your meal ticket to feed

Karma got to you

Ego ate through you

Nothing left to do but to bleed

Now out come the wolves

out come the wolves

out come the wolves

out come the wolves

Cave in, just surrender

You know you're already six-feet down

Cave in, just surrender

Cuz you have nowhere to go but down

Right now, it's over right now

Right now, it's over right now

Your friends

Call them yes men

Ain't always the best men

To trust in or to believe

The credit you were taking
Let's just call it faking
Is obvious, everyone can see
Got a good ride on our coat tails
Now it's time to set sail
and leave you tied up to the tree
Karma got to you
Ego ate through you
Nothing left to do but to bleed

Now out come the wolves
out come the wolves
out come the wolves
out come the wolves

Cave in, just surrender
You know you're already six-feet down
Cave in, just surrender
Cuz you have nowhere to go but down

Out come, out come the wolves [x4]
Come and get it
They can smell it
Fear is what controls you
If you let it
It will divot
Your entire soul through
They're on to you

Cave in, just surrender
You know you're already six-feet down
Cave in, just surrender
Cuz you have nowhere to go
Cave in, just surrender

You know you're already six-feet down

Cave in, just surrender

Cuz you have nowhere to go but down

Right now, it's over right now.
