

Zeebee, Chemistry

Dangerous
Are some feelings dangerous
And revealing
To share a passion
Might be healing
And if I try to realise
What this might be
What if might be true
Am I supposed to change the world
If there ain't such a rule
The chemistry
Between you and me
It's the chemistry
Between you and me

And if I try to
And if I try to realise
And if I try to
But if I try to realise
What this might be
What if might be true
Am I supposed to change the world
If there ain't such a rule

It's the chemistry
Between you and me
It's the chemistry
Between you and me

In all my heavens best
But if I try to realise
What it might be
What if might be true
Am I supposed to change the world
If there ain't such a rule

It's the chemistry
Between you and me
Chemistry
Chemistry
It's the chemistry
Chemistry
But if I try to realise
What this might be
What if might be true
Am I supposed to change the world
If there ain't such a rule
It's the chemistry
Between you and me
