

Zoetrope, Seeking Asylum

They've blown you out of house and home
You turn around you're all alone
Visions creep into your head
You think about the life you've led
You started out a small time hood
Stealin' cars your life is good
Then night flights to the southeast bay
You ice six men along the way

CHORUS:

Seeking asylum from the D.E.A.
It's a man made nightmare and I'm seeking asylum

Bodyguards became your scene
Limousines and fashion queens
All night self indulgent party scenes
Protection paid keeps your name clean
You wake today just to find
Ten million drop somehow went wrong
Your house was bombed your men all dead
Nothing left alive inside

CHORUS

Take your next step it will be your last
You never thought your tiome would come
Just as you're wondering how you'll die
Bullets slam into your eyes
You stumble back your knees give way
You die alone it's one way down
Violence and force power and greed
It's all in life you've ever known

CHORUS
