

Zombina And The Skeletones, Staci Stasis

Your in, suspended animation
In a tank on a space station
Somewhere out there
Your skin glowing with radiation
But I'm growing impatient
Oh yeah, oh yeah

In space, cos space is what you needed
And thats why you retreated
Up through the sky
Your face is frozen in confusion
As paranoid delusions
Flash behind your eyes

And I'll probably never see you again
And I'll probably never see you again

Staci Stasis
If you stay this way forever we will never be together
Staci Stasis
Taking samples of your tissue
But I just wanna kiss you
Oh oh oh

I've waited for hours and hours and hours
I've waited for days and days and days
I've waited for weeks and weeks and weeks
Cos I've waited for you

I've waited for months
(Hour and hours and hours)
I wait for years
(Days and days and days)
I wait forever
(Weeks and weeks and weeks)
Because I'm waiting for you

& I've waited for Staci Stasis

If you stay this way forever
We will never be together
Oh oh

Staci Stasis
Taking samples of your tissue but I just wanna kiss you
Oh oh oh

And I'll probably never see you again
Staci Stasis
Staci Stasis
