

Zombina And The Skeletones, The Kids Are All D

Comin' on radio waves
Transmitted from space
Another death ray jingle for you deadbeats
We're sowing the seeds
Of a new disease
A whole new breed of mutations
The root of all evil has turned into another ugly tree
We got a death ray

We got the drop on the deadbeats
We got the drop on the dead meat
We got the souls of the whole damn world
In our hands...
And the death rays comin' too quick to run from it
Go!

The sun is burnin' with hate
For this human race
Put on a happy face as you burn alive
Yeah, deathray kids ain't got no teeth
But they all got razor smiles
On their faces, we scraped them all off the classroom walls
I blame the parents...
