

# Zuba, Trippin'

1) When im in my bed  
Lonliness can turn to sorrow  
The window pulls my sight  
To the sky and see tomorrow, all the stars are spinning in my head

2) Saturn seems so far  
Surfing on the planet mars  
comets fill my eyes  
They shoot right by  
And leave their tales in my head, all my worries go away

Chorus -  
I told my psyche not to get lost in complexities  
Enjoy the simple 1's and 2's of life and liberty  
And finally undercut the arms that hold me down  
My god im trippin on this type of sound

3) Then im deep in sleep  
Stories flash into my life  
So quickly they pass by  
And I find that I am overdosing on the world, floating endlessly through night

Bridge -  
Come and take my hand, lets look inside  
Part of the plan, to help realize

Chorus -  
My mind it makes a world out of nothingness

And then I fall into a stupid mess of my regrets  
All the time I was running and I tried to hide  
But now im trippin as I take a ride

Rap:  
So many days I'm smiling through the haze of last nights lingering effects  
Ringin out the smoke, the beer, the powerful smell of night life atmosphere  
Too many pretty faces lost in a drifting drunken blur  
Trying to remember what I did, trying to remember who you were  
Reflecting on frustrations has got the best of me  
So behold as we strip this dime store novel mystery and we float y'all  
Interplanetary groove  
'Cause Saturn Mars to so many they're just stars  
But like Sun Ra, space is the place for the entire human race  
So get ready y'all as we keep on payin' our dues  
Who doubts a groove like this can make you move

4) Universal time  
keeping both my feet connected to it all  
Helps me see my life in full light  
helps me know the wrong and right, like the birth of something new

5) And the waves crash on the shore  
Their repetitious rythms synching up the world  
Dreams travel through night  
Images throughout my life..... floating endlessly while I sleep

Chorus #1
