

# Zyklon, Disintegrate

Conflict to the final end

Consider if you should function as a fraction or drown in the attempt of making an action

Straight to hell and back, being in the midst of a crowd

No wonder violence are back in rack

Better stand still or shout it out loud: Disintegrate the different, it gives meaning in order

Cut off the radical, close any border

Fuck the controversial could ideology ever be shorter?

Ever wondered how to reflect as an independent? So, when did individualism become the crime?

An instruction should follow consequent

Hell, I am gonna make it all a fucking rhyme

So for now, close eyes and become the participated

Play the pity game

Disintegrate the different, it gives meaning in order

Cut off the radical, close any border

Fuck, the controversial, could ideology ever be shorter?
